Clayton Szelestey

Lab 9

Database Management

**People**: PID → First_Name, Last_Name, Address, Phone_Number
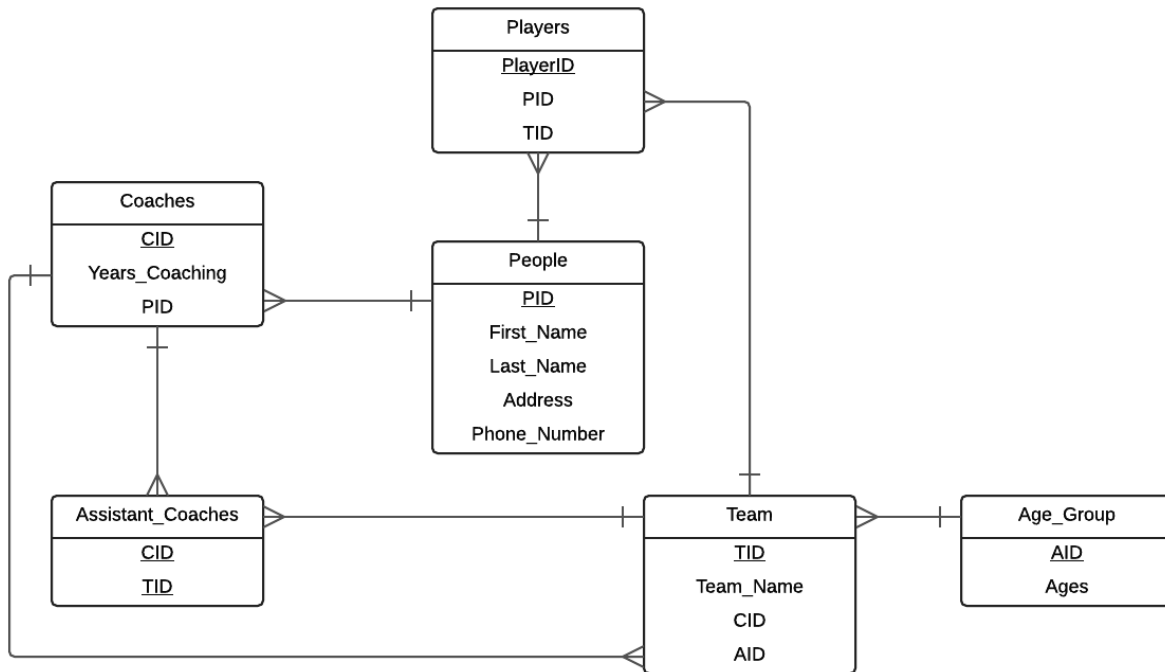

**Players**: PlayerID → PID, TID

**Coaches**: CID → Years_Coaching, PID

**Assistant_Coaches**: (CID, TID)

**Team**: TID → Team_Name, CID, AID

**Age_Group**: AID → Ages

The database is in 3NF because each domain contains only atomic values, there are no partial key dependencies, and there are no multi key dependencies.
